About US

We are manufacturer and exporter of Japanese high-quality foodservice equipment, established in 1942.

At first, Chubu was opened as a foundry iron works. Our iron works technology has been developed and now it became stable foundation for our Foodservice equipment.

We develop and supply with compact, efficient, and durable Japanese machinery to meet the increasing global demand for commercial equipment in the food service industry.

Our clients include hotels, restaurants, fast-food chains, convenience stores and caterers in many countries.

We believe that our Chubu's Japanese quality equipment will assist and broaden your commercial foodservice business.

History of

Japanese Shaved Ice

In Japan, there are records of a "himuro" for storing ice, and the himuro in Tenri City, Nara Prefecture, is believed to have been built about 1,300 years ago.

It is recorded that these himuros were presented to the Heijo Palace in summer. Ice has been a precious commodity since that time.

There is also a record that 1,200 years ago, "korimizu," or ice water made by shaving ice and pouring syrup over it, was drunk by aristocrats during the Heian period.

This is the prototype of today's shaved ice.

With the development of ice-making technology 150 years ago, shaved ice became widely popular among the general public and became a summer tradition.

As you see, shaved ice has been loved in Japan for over 1,000 years. But particularly in recent years, a wider variety of shaved ice has been available all over Japan. It is not only popular at summer festivals and coffee shops, but has also become a dessert in luxury hotels, and the possibilities for flavoring are expanding rapidly.

How to call shaved ice in the world

Traditional
but innovative

TWO TYPES OF ICE SHAVER

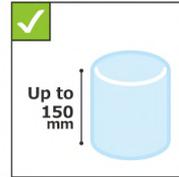

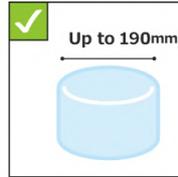

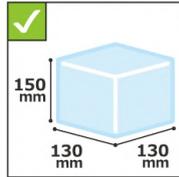

BLOCK ICE SHAVER

Recommended Block Ice

Up to about 13cm square

For block ice shaver, go to P05

How to use

1 Open the front shield.

2 Position ice block, turn crank handle so the prongs firmly engage ice block.

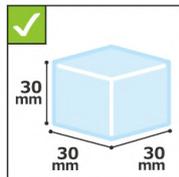

3 Turn on the switch. Adjust the texture of shaved ice during operation.

CUBE ICE SHAVER

Recommended Cube Ice

Up to about 3cm square

For cube ice shaver, go to P07

How to use

1 Open the lid and put in ice cubes.

2 Close the lid.

3 Adjust the texture of shaved ice. (Shaving will not start while the lid is open.)

4 Turn on the switch. Adjust the texture of shaved ice during operation.

Let us know the voltage and plug in your country! We will introduce you to the best model.

BLOCK ICE SHAVER

Model No.	Electric voltage	Unit dimensions	Net weight	Gross weight	Carton size	Ice capacity / Size of block ice
HB600A	220~240V	349x447xH702(+186)mm	19kg	25.4kg	52x40xH90cm	13 x 13 x H13cm
HB320A	220~240V	355x402x565(+195)mm	20kg	23kg	45x53xH63cm	13 x 13 x H13cm
HB310B2	220~240V	347x396x600(+179.5)mm	17kg	21kg	36x48xH79cm	13 x 13 x H13cm
HA-110S	Manual	399x273x605mm	14.5kg	19.5kg	36x33xH80cm	13 x 13 x H13cm

FROZEN FRUITS

MILK-MADE OR FLAVORED ICE

FAQ

How can I order a machine?

Just contact us, and we will introduce our reliable distributor who is located near to you. Otherwise, you can place an order directly with us and we can arrange international shipping.

Can I use the machine in my country?

Please check the electric voltage in your country. Most of our machines are suitable for use in countries with electric voltages of 100V to 230V. We can advise you which model is suitable for you.

Is there any guarantee? What if the machine is broken, or needs any repairs?

Each distributor has their own terms and conditions regarding guarantees, so you can contact the distributor in any case you have some problems with the machine. As for the direct order from us, we can supply you with the parts (except for consumable parts like blades) for free when there is any initial failure. Contact us directly, and we will see how we can assist you with.

I need technical information like an electronic diagram.

Some of them are available on our website, but you can contact us anytime, and we will gather the required information from the related teams internally.

How do you export products?

We will give you some options like AIR and SEA shipment with the cost/time information. You can select the best option for your perusal.

How can I be a distributor of your products?

Thank you very much for your interest! We are ready to give you special distributor prices. Feel free to contact us to discuss it further.

I can't decide which ice shaver is the best for me.

It mostly depends on the availability of the ice. If cubic ice is easier for you to get, we recommend cube ice shavers. Generally speaking, block ice shavers create fluffier shaved ice than cube ice shavers. If you still have any questions, please feel free to contact us.

Any certificate?

All the materials comply with Japanese food safety standards. Regarding global standards, you can find trademarks of CE, NSF and UL on the applicable product pages.

Contact us now for price quotation, how to operate, and any advice regarding our products.

CUP BLENDER MACHINE

- Electric voltage:
100 / 110 / 220 / 230 / 240V
- Automatic cleaning function
- Mixing ingredients in a plastic cup

CUP BLENDER MACHINE

SM500A/SM50WA

You can use fruits, vegetables, chip ice and beverage base.

CAUTION!

Frozen ingredients are too hard for the blades. Avoid using frozen foods, or warm them a bit in the microwave before use.

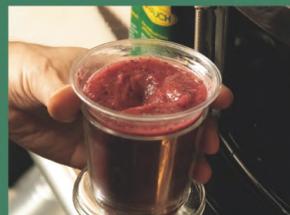

How to use

1 Put the ingredients into a plastic cup, and set a cup protection cover.

2 Place the cup into a machine.

3 Just select the menu and push the start button. The smoothie drink will be ready.

4 Decorate and serve customers.

Particular plastic cups (CIP-332D/BIP-432D) should be used. Search for the model code on the internet to be connected with a supplier.

PRO CHEF

VEGETABLE SLICER

**Easy functions,
compact table-top design.**

The size of the kitchen doesn't matter.
Just plug in, and you can enjoy an amazing
time-efficient performance.
